

■ Archive.One ■

Add-on for SAP® Business One to archive documents in a comfortable way without changing program.

Overview

Novaline **Document Management and Archiving** is integrated in SAP Business One® in such a way that documents generated there (offers, invoices, etc.) are printed and simultaneously indexed, linked to the relevant address and filed in the archive. Full-text search is also possible.

During document processing, the user can display previously archived documents in SAP Business One® (offers, invoices etc.) without changing programs.

Further documents which are not created in SAP Business One® e.g. Word documents, incoming and outgoing e-mails or faxes may be comfortably archived as well as documents in paper form via an expansion module.

E-Mail Archiving is oriented to the post-boxes of each user and to the e-mail addresses of business- and contact partners within SAP Business One. To these addresses incoming and outgoing e-mails (incl. attachments) will be archived. A status information delivers an overview of archived, blocked, not allocable e-mail addresses and even those e-mails which still have to be archived.

- Automatic indexing for outgoing documents
- Full text indexing / OCR
- Extensive search (key words, full text, index, time-periods)
- Automatic allocation of documents via ScanCode
- Export of archived documents ('Mobile Archiving', e.g. for field work)
- Document Management with templates
- Automatic archiving of incoming and outgoing e-mails including the attachments out of MS Outlook, Exchange-Server and Tobit (David/Info-Center)

■ Archive.One Features ■

System requirements

- Client: Windows 2000 , XP-Pro. , Vista , 7
- Server: Windows-2000 , 2003 , 2008
- Database: MS-SQL-Server 2000 , 2005 , 2008

Workstation license

- Administration incl. advanced rights management
- Direct filing of documents in binary form in the database
- Interface to SAP Business One
- Presetting of the automatic indexing (key words, full text) for outgoing documents from SAP Business One
- Automatic archiving of outgoing documents out of SAP Business One
- Sending e-mails including archiving out of SBO documents
- Document viewer
 - Search: full text search/index search/limited search
 - Selective list view or tree view
